- **Concentric Zone Model:** Suggests cities grow outward in rings from the central business district (CBD).
- **Sector Model:** Proposes that cities develop along sectors or wedges radiating from the center.
- **Multiple Nuclei Model:** Argues that cities have multiple centers or nodes, each serving different functions.

Harris critically evaluates these models, discussing their applicability and limitations.

4. Social and Economic Segregation

The book emphasizes how urban spaces often reflect social inequalities, with residential, racial, and economic segregation shaping city life. Harris explores how factors like income, ethnicity, and access to services influence spatial distribution within cities.

5. Urban Planning and Policy

Harris underscores the importance of planning in guiding sustainable urban development. He discusses issues such as:

- Land use planning
- Transportation infrastructure
- Housing policies
- Environmental management

His analysis stresses the role of effective governance in creating equitable and resilient urban environments.
